

CRESNET-NP

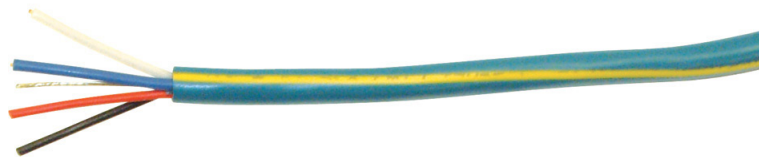

Cresnet® Control Cable, Non-Plenum

The Cresnet® bus is the communications backbone for many Crestron® keypads, lighting controllers, shade motors, sensors, and other devices. Cresnet is a simple, yet flexible 4-wire network that provides bidirectional communication and 24VDC power for Cresnet devices. Cresnet allows for both homerun and daisy-chain wiring topologies, with cable lengths up to approximately 3000 feet (915 meters) per run.

Within a single jacket, CRESNET-NP furnishes (1) pair 18 AWG for 24VDC and Ground, and (1) twisted pair 22 AWG with shield for control data. CRESNET-NP is available in three colors: teal, black, and orange.

For plenum applications, use [CRESNET-P](#).

For long runs to devices that draw a large amount of power, use [CRESNET-HP-NP](#).
